Customer Reviews

Looking through this math book I am quite pleased. I bought this and some others to supplement the summer time so my child doesn't forget everything. This is right along what he learned with a little new information. Just what I wanted. And there is an answer key in the back.

I love these books. They have clear directions and instructions for my daughter to use them without any help from anyone. Big pictures well written. Packaged perfectly and delivered in good timing.

It is really helping my son to get back into Math
